Connections and Preparations

Installing the Unit

The installation distance between the unit and a screen varies depending on the size of the screen or whether or not you use the lens shift features. Install this unit so that it fits the size of your screen. For details on the distance between the unit and the screen (the projection distance) and the size of projected video, see "Projection Distance and Lens Shift Range" (page 48).

1 Position the unit so that the lens is parallel to the screen.

Top view
Screen

2 Project an image on the screen and adjust the picture so that it fits the screen (page 6).

Note

When using a screen with an uneven surface, stripes pattern may rarely appear on the screen depending on the distance between the screen and the unit or the zooming magnifications. This is not a malfunction of the unit.

Adjusting the Picture Position

Project an image on the screen and then adjust the picture position.

Remote control detector
Tips
- The I/⏻ (On/Standby), INPUT, and MENU buttons on the side panel of the unit have the same functions as those on the remote control. The ⬆/⬇/⬅/➡ (arrow)/ENTER button of the unit has the same function as the ⬆/⬇/⬅/➡ (arrow)/ ⊕ (enter) button on the remote control. The LENS button functions the same way as the LENS ADJUSTMENT (FOCUS, ZOOM, SHIFT) buttons on the remote control.
- When adjusting the lens, each time you press the LENS button on the unit, the lens adjustment function switches between "Lens Focus," "Lens Zoom" and "Lens Shift."

FOCUS → ZOOM → SHIFT

Note

Depending on the installation location of the unit, you may not be able to control it with the remote control. In this case, point the remote control at the remote control detector of the unit or the screen.

1 After connecting the AC power cord to the unit, plug the AC power cord into a wall outlet.
The ON/STANDBY indicator lights in red and the unit goes into standby mode.
Lights in red.

2 Press the I/⏻ (On/Standby) button to turn on the unit.
The ON/STANDBY indicator flashes in green, and then lights in green.

Flashes in green for tens of seconds and then lights in green.

3 Adjust the focus.
Press the LENS ADJUSTMENT (FOCUS) button to display the Lens Focus adjustment window (test pattern). Then adjust the focus of the picture by pressing the ↑/↓/←/→ button.

Tips
- When "Lens Control" is set to "Off" on the Installation 🔧 menu, you cannot adjust the focus, the picture size or the proper position by pressing the FOCUS, ZOOM or SHIFT button (page 30).
- When "Test Pattern" is set to "Off" on the Function 📋 menu, the test pattern is not displayed (page 28).

Note

Adjust the lens by using buttons on the remote control or the control panel of the unit. Never make adjustments by directly turning the lens with your hands, which may cause damage or malfunction to the unit.

4 Adjust the picture size.
Press the LENS ADJUSTMENT (ZOOM) button to display the Lens Zoom adjustment window (test pattern). Then adjust the size of the picture by pressing the ↑/↓/←/→ button.
To make the picture larger, press ↑/→.
To make the picture smaller, press ↓/←.

5 Adjust the picture position.
Press the LENS ADJUSTMENT (SHIFT) button to display the Lens Shift adjustment window (test pattern). Then adjust to the proper position of the picture by pressing the ↑/↓/←/→ button.

Tip
Whenever you press the ⊕ button, the test pattern disappears.

Note

When adjusting the picture position, do not touch the lens unit, otherwise your fingers may be pinched by the moving parts.

To adjust the horizontal position

Press ←/→.

The picture projected on the screen moves right or left by a maximum of 31% of the screen width from the center of the lens.

Top view

31% 1 screen width 31%

▨ : Picture position when moving the picture to the left at maximum
◩ : Picture position when moving the picture to the right at maximum
Press the RESET button on the remote control while the Lens Shift adjustment window is displayed, the horizontal position returns to the center of the lens (factory default position). The zoom and focus are not changed.

To adjust the vertical position

Press ↑/↓.

The picture projected on the screen moves up by a maximum of 80% or moves down by a maximum of 80% of the screen height from the center of the lens.
Side view

To adjust the tilt of the installation surface

If the unit is installed on an uneven surface, use the front feet (adjustable) to keep the unit level.

Turn to adjust.
Front feet (adjustable)
Notes

- If the unit is tilted up or down, the projected image may be trapezoidal.
- Be careful not to catch your finger when turning the front feet (adjustable).

Lens adjustment window (test pattern)
The dashed lines show the screen sizes of each aspect ratio.

Connecting to Video Equipment or a Computer

You can enjoy high picture quality by connecting a DVD player/recorder, Blu-ray Disc player/recorder, or PlayStation® equipped with HDMI output to the HDMI input of the unit.

When making connections, be sure to do the following:
- Turn off all equipment before making any connections.
- Use the proper cables for each connection.
- Insert the cable plugs properly; poor connection at the plugs may cause a malfunction or poor picture quality. When pulling out a cable, be sure to pull it out from the plug, not the cable itself.
- Refer to the operating instructions of the connected equipment.

Right side of the unit

HDMI cable (not supplied)

⊿ : Video signal flow   Use a Premium High Speed HDMI cable on which the cable type logo is specified.

Computer

Equipment with HDMI output connectors

AV amplifier   Speakers

to HDMI output
Notes
- Use a Premium High Speed HDMI cable. If using a cable other than a Premium High Speed cable, 4K video images may not be properly displayed.
- When connecting an HDMI cable to the unit, make sure the ▼ mark on the upper part of the HDMI input of the unit and the ▲ mark on the connector of the cable are faced at each other.
- If the picture from equipment connected to the unit with an HDMI cable is not correct, check the settings of the connected equipment.
- If you set your computer, such as a notebook type, to output the signal to both computer's display and this equipment, the picture of the equipment may not appear properly. Set your computer to output the signal to only the external monitor. For details, refer to the computer's operating instructions supplied with your computer. For settings of the computer, consult with the manufacturer of the computer.

When you monitor and control the projector via the network, access the Setup page of the projector (page 33) via a Web browser and enable the desired control protocol.

Projecting

Projecting the Picture

1 Turn on both the unit and the equipment connected to the unit.

2 Press INPUT to display the input palette on the screen.

3 Select the equipment from which you want to display images.
Press INPUT repeatedly or press ↑/↓/⊕ (enter) to select the equipment from which to project.

Tips
- When "Status" is set to "Off" on the Setup 🧰 menu, the input palette does not appear. Press the INPUT button to switch between input terminals sequentially.
- You can change the language for the menu and on-screen displays in "Language" on the Setup 🧰 menu (page 26).

Turning Off the Power

1 Press the I/⏻ (On/Standby) button.
The message "POWER OFF?" appears.

2 Press the I/⏻ (On/Standby) button again before the message disappears.
The ON/STANDBY indicator flashes in green and the fan continues to run to reduce the internal heat.

The fan stops and the ON/STANDBY indicator changes from flashing green to remaining red.

The power is turned off completely, and you can disconnect the AC power cord.

Note

Never disconnect the AC power cord while the indicator is flashing.

Tip
You can turn off the unit by holding the I/⏻ (On/Standby) button for about 1 second, instead of performing the above steps.

Watching 3D Video Images

You can enjoy powerful 3D video images, such as from 3D games and 3D Blu-ray Discs, using the Active 3D Glasses.

1 Turn on the HDMI equipment for 3D compatibility connected to the unit, then play the 3D content.
For details on how to play 3D content, refer to the operating instructions for the connected equipment.

2 Turn on the unit and project the 3D video image.
For details on how to project the image, see "Projecting the Picture" (page 11).

3 Turn on the 3D glasses, and then put them on so that they fit comfortably.
For details on how to use the 3D glasses, see "Using the 3D Glasses" (page 12).

Tip
The factory default setting for "2D-3D Display Sel." is "Auto" to allow projecting 3D video images automatically when the unit detects 3D signals.

Notes

- It may not be possible to display 3D video image, depending on the type of signal. Set the "2D-3D Display Sel." to "3D," and "3D Format" to "Side-by-Side" or "Over-Under" to suit the format of the 3D content you want to watch (page 27).
- Use the 3D glasses within the communication range (page 12).
- There are differences in perception of 3D video images among individuals.
- When the temperature of the usage environment is low, the 3D effect may be diminished.

Adjusting/Setting the 3D functions

You can adjust/set the 3D functions by pressing the 3D button on the remote control or with the "3D Settings" of the Function 📋 menu. For details, see "3D Settings" (page 27).

Using the 3D Glasses

1 Turn on the 3D glasses, and register them on the unit. For details on how to register the 3D glasses, refer to the operating instructions supplied with the 3D glasses.

2 Put on the 3D glasses.

3 Turn toward the screen.

Precautions for use

Misoperation may occur if:
- The viewing position is too far from the projector
- There are other communication devices, such as a wireless LAN (IEEE802.11 b/g/n) or a microwave with a bandwidth of 2.4 GHz, near the unit

3D glasses communication range

The following figure indicates the communication range of the 3D glasses. If you try to watch 3D video images from a distance greater than the communication range or install the unit outside the communication range, the 3D glasses may not be able to display the images properly. Also, the distance varies depending on the environment of the room and installation environment of the unit.

10 m
Using the Picture Position

You can store up to five combinations of lens settings (focus, picture size, picture position), aspect ratio, and blanking. These settings can be recalled.
In the factory preset setting, the Picture Position is not stored.

1 Press POSITION.
The Picture Position selecting palette is displayed.

Picture Position
1.85:1 1.85:1
2.35:1 2.35:1
1   ---
2   Custom 2
3   Custom 3
Set: ⊕ POSITION
2 Press POSITION repeatedly, or press ↑/↓/⊕ to select the position.
The settings of the position selected is recalled.
Store or delete lens settings, aspect ratio, and blanking in the "Picture Position" of the Screen 🖽 menu (page 24).
The position where the lens settings, aspect ratio, and blanking are not stored is displayed as "---."

Tip
To hide the reminder displayed on the screen when the position is read out, set "Status" to "Off" on the Setup 🧰 menu.

Image of the lens moving

In the example below, the images with aspect ratio of 1.78:1 (16:9) and 2.35:1 are projected on a 2.35:1 screen.
When a 1.78:1 (16:9) image is input

↓
When a 2.35:1 image is input

↓ Press the POSITION button.
The 2.35:1 image expands to fill the screen.

Notes

- After you have selected and confirmed the lens position, the lens starts to move. Do not touch, or place anything near, the lens, otherwise it may cause injury or a malfunction.
- If you press any button on the remote control or the unit while the lens is moving, the lens stops. In this case, select the lens position again or adjust the lens manually.
- The Picture Position function is not guaranteed to reproduce the lens settings precisely.
- When you use the subtended screen angle of two or more aspects using lens zoom, install the unit within the specified parameters referring to "Projection distance" (page 49). With some setting positions, the range of lens shift may be restricted, even though the unit is installed within the specified parameters.

Selecting the Aspect Ratio According to the Video Signal
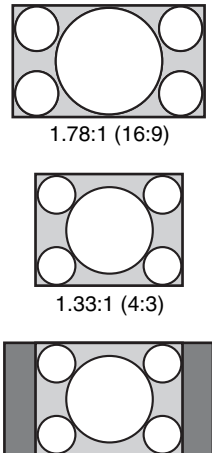

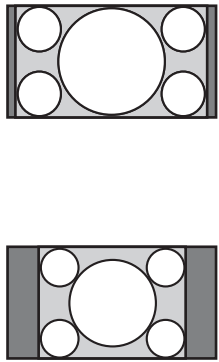

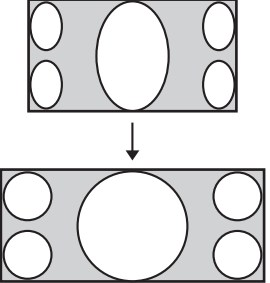

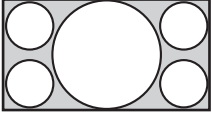

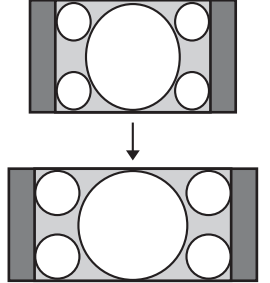

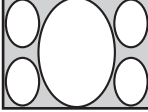

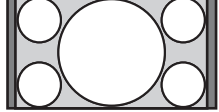

You can select an aspect ratio best suited for the video signal received.

Press ASPECT.
Each time you press the button, you can select the "Aspect" setting. You can also select it using the menu (page 24).

ASPECT button
Original image	Recommended setting and resultant images
1.85:1 / Squeezed 1.85:1	1.85:1 Zoom
2.35:1 / Squeezed 2.35:1	2.35:1 Zoom

Original image	Recommended setting and resultant images
 1.78:1 (16:9) 1.33:1 (4:3) 1.33:1 (4:3) with side panels	Normal
 2.35:1	V Stretch ↓ When using an anamorphic lens
 16:9	Squeeze ↓ When using an anamorphic lens
 Squeezed	Stretch

Note

Selectable aspect modes vary depending on the input signal
(page 44).

Notes on switching the "Aspect" setting

- Select the aspect mode taking into account that changing the aspect ratio of the original picture will provide a different look from that of the original image.
- Note that if the unit is used for profit or for public viewing, modifying the original picture by switching the aspect may constitute an infringement of the rights of authors or producers, which are legally protected.

Selecting the Picture Viewing Mode

You can select the picture viewing mode that best suits the type of video source or room conditions.
You can save and use different preset modes for 2D/3D/HDR respectively.

Press one of the CALIBRATED PRESET buttons.

CALIBRATED PRESET buttons
Setting items	Description
CINEMA FILM 1	Picture quality suited to reproducing the highly dynamic and clear images typical of master positive film.
CINEMA FILM 2	Picture quality suited to reproducing the rich tone and color typical of a movie theater, based on the "CINEMA FILM 1."
REF	A picture quality setup suitable for when you want to reproduce faithfully the original image quality, or for enjoying image quality, without any adjustment.
TV	Picture quality suited for watching TV programs, sports, concerts, and other video images.
PHOTO	Ideal for projecting still images taken with a digital camera.
GAME	Picture quality suited to gaming, with well-modulated colors and fast response.
BRT CINE	Picture quality suited for watching movies in a bright environment, such as a living room.
BRT TV	Picture quality suited for watching TV programs, sports, concerts, and other video images in a bright environment, such as a living room.
USER	Adjusts the picture quality to suit your taste then saves the setting. The factory default setting is the same as "REF."

Using the Menus

Note

The menu displays used for the explanation may be different from the actual menu display.

Operation through the Menus

The unit is equipped with an on-screen menu for making various adjustments and settings. If you select an item name followed by an arrow (▶), the next menu window with setting items appears.

1 Press MENU.
The menu window appears.

When the screen display appears, select "Yes" using ⬅ and press ⊕.

All of the following settings are reset to its factory preset value:

"Reality Creation," "Cinema Black Pro," "Motionflow," "Contrast," "Brightness," "Color," "Hue," "Color Temp.," "Sharpness," and "Expert Setting" on the Picture 🖼 menu

To reset the items that have been adjusted

Select an item in the menu screen, and display the pop-up menu, the setting menu, or the adjustment menu.

Press RESET on the remote control to reset only the selected settings to its factory preset value.

Note

The RESET button on the remote control is available only when the adjustment menu or the setting menu is selected.

⚙ Picture Menu

The Picture menu is used for adjusting the picture.

Note

These items may not be adjustable or configurable, depending on the type of input signal. For details, see "Input Signals and Adjustment/Setting Items" (page 42).
Item names in brackets represent those printed on the remote control.

| Setting items	Description
Calib. Preset [CALIBRATED PRESET]	You can select the picture viewing mode that best suits the type of video source or the environment. You can save and use different preset modes for 2D/3D/HDR respectively. **Cinema Film 1:** Picture quality suited to reproducing the highly dynamic and clear images typical of master positive film. **Cinema Film 2:** Picture quality suited to reproducing the rich tone and color typical of a movie theater, based on the Cinema Film 1. **Reference:** A picture quality setup suitable for when you want to reproduce faithfully the original image quality, or for enjoying image quality, without any adjustment. **TV:** Picture quality suited for watching TV programs, sports, concerts, and other video images. **Photo:** Ideal for projecting still images taken with a digital camera. **Game:** Picture quality suited to gaming, with well-modulated colors and fast response. **Bright Cinema:** Picture quality suited for watching movies in a bright environment, such as a living room. **Bright TV:** Picture quality suited for watching TV programs, sports, concerts, and other video images in a bright environment, such as a living room. **User:** You can adjust the picture quality to suit your taste, and save the setting. The factory default setting is the same as "Reference." **Tip** Any adjustments to picture quality settings are saved for each input.
Reset	Resets all currently selected Calib. Preset mode settings to their default values (page 17). **Tip** Reset does not affect settings saved for items of "Color Temp."
Reality Creation [REALITY CREATION]	Adjusts the detail and noise processing of images. (Super-resolution function) **On:** Adjusts the settings of "Reality Creation." Database: Select "Normal" or "Mastered in 4K." "Mastered in 4K" provides image quality suitable for Blu-ray Disc™ "Mastered in 4K" releasing from Sony Pictures Home Entertainment. **Resolution:** When you increase the setting value, the texture and detail of the picture become sharper. **Noise Filtering:** When you increase the setting value, the noise (picture roughness) becomes less prominent. **D.Focus Optimizer:** When you set to "On," it optimizes the projected image. It achieves enhanced texture and picture details and sharpens the picture. **Test: On/Off:** Changes "On" and "Off" at a certain frequency to check the effect of "Reality Creation." **Tip** The display position of status during the test works together with the "Menu Position" setting (page 26). **Off:** The "Reality Creation" function is not applied.

Setting items	Description
Cinema Black Pro	
Advanced Iris and Laser Setting [ADVANCED IRIS]	**Dynamic Control:** Adjusts the range of the laser light and iris (diaphragm). **Full:** Automatically adjusts the laser light, iris (diaphragm), and signal processing according to the brightness level of the input source and optimizes the amount of light. This results in a bright and high contrast image. **Limited:** Compared to "Full," it suppresses the movement and brightness of the laser light and iris (diaphragm). This is suitable for viewing a picture in a dark room. **Off:** The "Dynamic Control" function is not applied. **Laser Light Output:** The higher the setting, the brighter the picture. The lower the setting, the darker the picture. **Tip** Adjust "Laser Light Output" according to the brightness of the picture.
Dynamic HDR Enhancer [CONTRAST ENHANCER]	For HDR content, automatically adjusts the range of movement of the laser light and iris (diaphragm), and the signal level of bright and dark parts to optimize contrast according to a scene. Increases image sharpness and makes the image dynamic. "Contrast Enhancer" appears instead of "Dynamic HDR Enhancer" and performs the image processing suitable for the SDR signal in the following cases: - When the SDR signal is input with "Auto" set for "HDR" - When "HDR" is set to "Off" **High/Middle/Low:** You can adjust the Dynamic HDR Enhancer/Contrast Enhancer. **Off:** The Dynamic HDR Enhancer function is not applied.
Motionflow [MOTIONFLOW]	**Impulse:** Reproduces original picture quality. Provides cinema-like picture, which may flicker. **Combination:** Reduces motion blur while maintaining brightness for high-speed picture content. **Smooth High:** Provides smoother picture movement; especially effective for film-based content. **Smooth Low:** Provides smoother picture movement for standard use. **True Cinema:** Images, such as a movie created in 24 frames per second, are reproduced at the original framerate. **Off:** The "Motionflow" function is not applied. **Tips** • Select "Off" if the selected "Smooth High," "Smooth Low," "Impulse," "Combination," or "True Cinema" results in a distorted picture. • Depending on the picture content, you may not see the effect visually even if you have changed the settings. • Only "Off" or "Impulse" is available when a signal with a resolution of 4096 × 2160 is input. • Selecting "Impulse" darkens the picture. Also, it may cause flicker.
Contrast [CONTRAST]	Adjusts the contrast. Higher values increase the sharpness in images, while lower values decrease the sharpness. You can make adjustments by pressing the CONTRAST +/- button on the remote control. "Contrast(HDR)" appears instead of "Contrast" for the following cases: - When the HDR signal is input with "Auto" set for HDR - When "HDR" is set to "HDR10," "HDR Reference," or "HLG"
Brightness [BRIGHTNESS]	Adjusts the brightness of the picture. The higher the setting, the brighter the picture. The lower the setting, the darker the picture. You can make adjustments by pressing the BRIGHTNESS +/- button on the remote control.
Color	Adjusts the color density. The higher the setting, the greater the intensity. The lower the setting, the lower the intensity.
Hue	Adjusts the color tone. The higher the setting, the more greenish the picture becomes. The lower the setting, the more reddish the picture becomes.

Setting items	Description

Color Temp. [COLOR TEMP]	Adjusts the color temperature.
	D93: Equivalent to 9,300 K color temperature normally used in TVs. Gives white colors a blue tint.
	D75: Equivalent to 7,500 K color temperature used as an ancillary standard illuminant. Gives a neutral tint between "D93" and "D65."
	D65: Equivalent to 6,500 K color temperature used as a standard illuminant. Gives white colors a red tint.
	D55: Equivalent to 5,500 K color temperature used as an ancillary standard illuminant. Gives white colors an even redder tint.
	Custom 1 to 5: Enables you to adjust, set, and store your favorite color temperature.
	The factory default settings are as follows.
	    Custom 1: Same as the "D93" color temperature setting.
	    Custom 2: Same as the "D75" color temperature setting.
	    Custom 3: Same as the "D65" color temperature setting.
	    Custom 4: Same as the "D55" color temperature setting.
	    Custom 5: Setting that prioritizes brightness.
	
	Tip
	You can adjust each item to a color temperature according to your preference.

Sharpness [SHARPNESS]	Sharpens the outline of the picture, or reduces the noise. The higher the setting, the sharper the picture. The lower the setting, the softer the picture, thus reducing the noise. You can make adjustments by pressing the SHARPNESS +/- button on the remote control.
Expert Setting	
NR (Noise Reduction)	Reduces the roughness or noise of the picture. **Auto:** Detects the noise level to reduce the roughness or noise of the picture automatically. **High/Middle/Low:** Select a setting according to the roughness or noise of the input signal source. **Off:** The NR (noise reduction) function is not applied. **Tip** The noise level may not be detected accurately with "Auto" depending on the input signal source. If the picture is unacceptable with "Auto," select a setting from among "High," "Middle," "Low" or "Off."
MPEG NR (MPEG Noise Reduction)	Reduces block noise and mosquito noise, particularly in digital signals. **Auto:** Detects the noise level to reduce the block noise and mosquito noise of the picture automatically. **High/Middle/Low:** Select a setting according to the block noise and mosquito noise of the input signal source. **Off:** The MPEG NR (MPEG noise reduction) function is not applied. **Tip** The noise level may not be detected accurately with "Auto" depending on the input signal source. If the picture is unacceptable with "Auto," select a setting from among "High," "Middle," "Low" or "Off."
Smooth Gradation	Smooths the gradation of the flat parts of images. **High/Middle/Low:** You can adjust the smooth gradation effect. **Off:** The smooth gradation function is not applied. **Tip** This item is not available for 3D signals.
Film Mode	According to the film source you have selected, make a setting for playback. **Auto:** Suitable for reproducing the original picture movement. Normally, set this to "Auto." **Off:** Plays back the picture in progressive format without detecting video signals automatically. **Tip** This item is compatible with a 1080i signal only.

Setting items	Description
Gamma Correction [GAMMA CORRECTION]	Adjusts the response characteristics of the tone of the picture. Select a favorite tone from 10 options. **1.8:** Bright Produces a brighter picture overall. **2.0** **2.1** **2.2** **2.4** **2.6:** Dark Produces a darker picture overall. **Gamma 7:** Enhances the dark parts and sharpens the images. **Gamma 8:** Produces a brighter picture than Gamma 7. Select this when you watch in a bright environment, such as a living room. **Gamma 9:** Produces a brighter picture than Gamma 8. **Gamma 10:** Increases the sharpness in images. Select this when you watch TV programs, etc., in a bright environment, such as a living room. **Off:** The "Gamma Correction" function is not applied.
Color Correction	**On:** Adjusts Hue, Saturation and Brightness of the selected colors. Repeat steps ① and ② described below to specify the target color. ① Press ↑/↓ to select "Color Select," then press ←/→ to select the color you want to adjust among "Red," "Yellow," "Green," "Cyan," "Blue," and "Magenta." ② Press ↑/↓ to select "Hue," "Saturation" or "Brightness," then adjust them to suit your taste using ←/→ while watching the projected picture. **Off:** The "Color Correction" effect is not applied.
Clear White	Emphasizes vivid whites. **High/Low:** You can adjust the "Clear White" effect. **Off:** The "Clear White" effect is not applied.
x.v.Color	Set this item when connecting the unit with equipment that supports x.v.Color and playing back an x.v.Color video signal. **On:** You can play back an x.v.Color video signal. **Off:** The "x.v.Color" function is not applied. **Tip** Setting x.v.Color to "On" disables gamma adjustment.

HDR	Sets how to play back HDR content.
	Auto: Distinguishes HDR content automatically and applies the optimal picture quality. You can change the HDR setting that is automatically selected when HDR10-compatible content is distinguished.
	    HDR10/HLG: When an input signal supports HDR10, the "HDR10" setting is applied, and when it supports HLG, the "HLG" setting is applied.
	    HDR Reference/HLG: When an input signal supports HDR10, the "HDR Reference" setting is applied, and when it supports HLG, the "HLG" setting is applied.
	When an input signal supports BT.2020, the "Color Space" is set to "BT.2020" automatically. When a signal other than BT.2020 is input, the mode set in "Color Space" is applied. ("BT.2020" is not available in this case.)
	HDR10: Set when playing back HDR10-compatible content.
	HDR Reference: This mode is suitable for playing back HDR10-compatible content with a maximum brightness of 1,000 nit.
	HLG: Set when playing back HLG-compatible content.
	Off: Set when playing back content other than HDR content.
	All of the modes of "Color Space" are selectable when "HDR10," "HDR Reference," "HLG," or "Off" is selected.
	
	Notes
	• If the setting is not correct for the input content, the bright and dark areas of the video may appear too bright or too dark.
	• When setting "HDR10" or "HDR Reference," compare the picture quality in both modes, and select the one that optimally displays the average brightness and tone of the bright parts.

Setting items	Description
Color Space [COLOR SPACE]	Converts the color space. **BT.709:** An ITU-R BT.709 color space, which is used for high-definition television broadcast or Blu-ray Disc. The color space is equivalent to sRGB. **BT.2020:** The color space is wider than BT.709. Use this setting when playing back HDR content. **Color Space 1:** The color space suited for watching TV programs and video images, such as sports, concerts, etc. **Color Space 2:** The color space suited for watching TV programs, sports, concerts, and other video images in a bright environment, such as a living room. **Color Space 3:** The color space suited for watching movies in a bright environment, such as a living room. **Custom:** You can adjust the color space setting. Color Space Color Select: ← Red → Cyan - Red: 0 Magenta - Green: 0 Sel:⊕⊕ Set:⊞ **Note** When "HDR" is set to "Auto," the selectable mode changes according to the signal type (page 21).
Input Lag Reduction	Reduces the delay of the display for a video. **On:** Shortens the time to display the input video image; effective for increasing the performance of the display reaction speed when using an external controller, etc. **Off:** Turns the Input Lag Reduction function off. **Tip** When "Input Lag Reduction" is set to "On," "Motionflow" (settings other than "Impulse"), "NR," and "MPEG NR" cannot be set.
⊞ Advanced Picture Menu

You can adjust the gaps in color that have occurred after a long period of use.

Notes
- Auto Calibration results in relatively coarse calibration. The color settings are not guaranteed to be the same as the factory default values.
- The colors are projected automatically while performing "Pre Check" or "Adjust." This is not a malfunction.
- Do not turn off the power or operate the remote control or control panel during "Pre Check" or "Adjust," as the process may be canceled.

Tips
- dE is an indicator of changing color. The smaller the value of dE, the fewer the changes caused by the color.
- Perform the calibration after the power has been on for more than 30 minutes.
- It takes a few minutes for "Pre Check" or "Adjust" to complete.
- When "Pre Check" or "Adjust" starts, the screen position may shift as the lens returns to its factory default position. After completion, the screen returns to its previous position automatically.
- If the environment, such as the brightness of the room, changes while performing "Pre Check" or "Adjust", measurement may be affected.
- If the "Pre Check" or "Adjust" function fails, try it again.

| Setting items	Description
Auto Calibration	**Pre Check:** Checks the color difference against the factory default settings, before calibration starts. **Adjust:** Performs Auto Calibration. **Before/After:** Toggles the factory default settings and the setting after the calibration at a certain frequency. You can check the effect of the calibration by monitoring the actual image. **Reset:** Resets the calibration results, and returns to the factory default settings.

⊞ Screen Menu

You can set the picture size, aspect mode, etc.

Note

These items may not be available, depending on the type of input signal. For details, see "Input Signals and Adjustment/Setting Items" (page 42).

Item names in brackets represent those printed on the remote control.

Setting items	Description
Picture Position [POSITION]	You can store up to five combinations of lens settings, aspect ratio, and blanking. After setting the lens (focus, picture size, picture position), select from "1.85:1," "2.35:1," "Custom 1," "Custom 2," or "Custom 3" depending on the subtended screen angle, and after confirming, continue by selecting "Save," "Delete," or "Select." **Save:** Stores the current lens settings (focus, picture size, picture position) in the selected position. If a setting is already stored in that position, it is overwritten. **Delete:** Deletes the stored setting. After the setting is deleted, "1.85:1," "2.35:1," "Custom 1," "Custom 2," or "Custom 3" in the display change to "---." **Select:** Recalls the settings of the selected position. **Tips** • The optimal aspect ratio is preset for each picture position. The aspect ratio can be changed and saved for each picture position. • When saving the Picture Position, temporarily move the picture from the saving point down 5 cm or more. Move the picture up again and save. This improves the precision of the Picture Position when calling it. **Notes** • After you have selected and confirmed the lens position, the lens starts to move. Do not touch the lens and the area around the lens, otherwise it may cause injury or a malfunction. • If you press any button on the remote control or the unit while the lens is moving, the lens stops. In this case, select the lens position again or adjust the lens manually. • When you use a 2.35:1 or a 16:9 subtended screen angle with the Picture Position function, make sure that the installation position is suitable (page 12). • The Picture Position function is not guaranteed to reproduce the lens settings precisely.
Aspect [ASPECT]	You can set the aspect ratio of the picture to be displayed for the current input signal (page 13). **1.85:1 Zoom:** A 1.85:1 aspect ratio picture is displayed in its original aspect ratio, enlarged so that black bands do not appear at the top and bottom of the projection surface. **2.35:1 Zoom:** A 2.35:1 aspect ratio picture is displayed in its original aspect ratio, enlarged so that black bands at the top and bottom of the projection surface are as small as possible. When you select "2.35:1 Zoom" from "Trigger Select 1/2" on the Installation ⚒ menu, a 12 V signal is output from the TRIGGER 1 or TRIGGER 2 connector (page 30). **Normal:** Input video is displayed in its original aspect ratio, enlarged to fill the projection surface. This mode is suitable for viewing 1.78:1 (16:9) and 1.33:1 (4:3) video. **V Stretch:** This is the most suitable mode for using a 2.35:1 screen to view 2.35:1 video with a commercially available anamorphic lens. When you select "V Stretch" from "Trigger Select 1/2" on the Installation ⚒ menu, a 12 V signal is output from the TRIGGER 1 or TRIGGER 2 connector (page 30). **Squeeze:** With this setting, 1.78:1 (16:9) and 1.33:1 (4:3) video will be displayed in their correct aspect ratios when you use a commercially available anamorphic lens. **Stretch:** Displays video that has been squeezed to 1.33:1 (4:3) as 1.78:1 (16:9) aspect ratio. **Tips** • When you select "V Stretch" or "Squeeze," select the anamorphic lens type from "Anamorphic Lens" in the Installation ⚒ menu. • Selectable aspect modes vary depending on the input signal (page 44). • Aspect setting is stored for each of the five Picture Positions. Adjust the aspect after selecting the Picture Position. Final adjusted values are stored automatically.

Setting items	Description
Blanking	This feature allows you to adjust the displayable region within the four directions of the screen. **On:** Select the edge to adjust by highlighting Left, Right, Top, or Bottom using the ↑/↓ button. Adjust the amount of blanking using the ←/→ button.

<div align="center">

Blanking	
Left:	2
Right:	3
Top:	2
Bottom:	3

Sel:⊞ Adjust:⊞ Set:⊞
</div>
Off: Turns off the Blanking function.

Tips
• Depending on the aspect ratio setting, right/left blanking may not be available.
• Blanking setting is stored for each of the five Picture Positions. Adjust the blanking after selecting the Picture Position. Final adjusted values are stored automatically.

🧰 Setup Menu

The Setup menu is used to change the factory preset settings, etc.

Setting items	Description
Status	Sets whether or not the on-screen display is displayed. **On:** Displays on-screen messages and menus. **Off:** Turns off the on-screen displays, other than certain menus, a message when turning off the power, and warning messages.
Language	Selects the language used in the menu and on-screen displays.
Menu Position	You can change the position to display the menu on the projection surface. **Bottom Left:** Displays the menu on the bottom left area of the projection surface. **Center:** Displays the menu on the center of the projection surface.
High Altitude Mode	Sets the unit to operate at the prevailing atmospheric pressure. **On:** Use this setting when using the unit at an altitude of 1,500 m (approx. 4,900 ft) or higher. **Off:** Use this setting when using the unit at normal altitudes. **Tip** When this item is set to "On," the fan noise becomes slightly louder since the fan speed increases.
Remote Start	Sets the Remote Start settings. **On:** You can turn on the power from a PC or a terminal which is connected to a network. **Off:** Turns off the Remote Start function. **Tips** • To use the function, the unit should be connected to the network in advance (page 31). • To turn on the power with the Remote Start function, a special command should be sent from a PC or a terminal. For details, consult with qualified Sony personnel. **Note** When the Remote Start is set to "On," the standby power requirement will increase. When Network Management is set to "On," Remote Start is automatically fixed at "Off" and is not displayed in the menu.
Network Management	**On:** Set when connected to the network and continuously communicating with the projector control equipment. **Off:** Turns off the Network Management function. **Note** When Network Management is set to "On," the network function is continuously enabled. Set Network Management to "Off" for normal use. If you set to "On," the power consumption increases.
Power Saving	Sets the Power Saving mode. **Standby:** If no signal is input for 10 minutes, power is turned off automatically and the projector goes into standby mode. **Off:** Disables the Power Saving function.
All Reset	All settings are initialized to their factory preset values.

▤ Function Menu

The Function menu is used for changing the settings of the various functions of the unit.

Setting items	Description
3D Settings	You can change the settings of the 3D function.

2D-3D Display Sel.	For Switching the video images to "2D" or "3D."
	Auto: Displays 3D video images when HDMI signals with 3D information* are input. Displays 2D video images when other signals are input.
	3D: Displays 3D video images according to the 3D system selected in "3D Format." However, when HDMI signals with 3D information are input to the unit, displays 3D video images according to the 3D system of those HDMI signals.
	* The 3D information is additional information to discriminate 3D. Some HDMI signals have additional information to discriminate 3D and some HDMI signals have none.
	3D Format: Set the 3D system when the input HDMI signals do not include 3D information.
	  Simulated 3D: Converts 2D video images to 3D video images. The setting can be made only for input the HD signals.
	  The simulated 3D feature may have limited effect, depending on the video source.
	  There are differences in perception of 3D video images among individuals.
	  Side-by-Side: Select this to display 3D images as two similar images, side-by-side.
	  Over-Under: Select this to display 3D images as two similar images, one above the other.
	
	Tips
	• "2D-3D Display Sel." cannot be set to "3D" for some video sources. For available 3D signals, see "Compatible 3D Signals" (page 43).
	• The simulated 3D feature may have limited effect, depending on the screen size (100 to 120 inches recommended) and the video source.
	• The menu display has a ghost while a 3D video image is displayed and is best viewed with the 3D glasses.

3D Depth Adjust	For adjusting the depth of the 3D video images on the projection surface. The setting can be made only when a 3D Format other than "Simulated 3D" is selected.
	
	       Depth − 2 − 1 0 + 1 + 2
	       Front ← Normal → Depth
	
	We recommend that "3D Depth Adjust" be set to "0." The 3D video images may be difficult to perceive, depending on the setting of "3D Depth Adjust."

Simulated 3D Effect	For adjusting the 3D effect when 2D content is converted to 3D video images. You can select the effect from among "High," "Middle," and "Low." **Tip** There are differences in perception of 3D video images converted by the simulated 3D function among individuals.
Dynamic Range	Sets the video input level for HDMI 1 and HDMI 2 connectors. **Auto:** Sets the video input level automatically. **Limited:** The video input level is set for signals that are equivalent to 16-235. **Full:** The video input level is set for signals that are equivalent to 0-255. **Note** If the video output setting of the connected HDMI device is not set correctly, light and dark parts of the video may appear too light or too dark.
HDMI Signal Format	Switches the video signal formats for 4K. **Standard Format:** Displays a picture in the standard HDMI format. **Enhanced Format:** Displays a picture in a more detailed HDMI format. **Tips** • A picture or sound may not be output normally when "Enhanced Format" is selected. In this case, set to "Standard Format." • It may take time to display a picture after switching the video signal formats.

Setting items	Description
Test Pattern	Displays a test pattern according to the setting. **On:** A test pattern appears on the screen to be used when adjusting the lens with "Lens Focus," "Lens Zoom," and "Lens Shift." **Off:** A test pattern does not appear. **Tip** While the test pattern is displayed, it is only displayed in green to allow you to adjust the focus easily.
Settings Lock	Locks menu item settings to prevent operational error (page 29). **Off:** Cancels the Settings Lock. **Level A:** Group 1 items (below) are not displayed on the menu, and are not available. **Level B:** Group 1 and Group 2 items (below) are not displayed on the menus, and are not available.

⚲ Installation Menu

The Installation menu is used for changing the installation settings.

Setting items	Description
Image Flip	Flips the picture on the screen horizontally and/or vertically. **HV:** Flips the picture horizontally and vertically. **H:** Flips the picture horizontally. **V:** Flips the picture vertically. **Off:** The picture does not flip. Use this item for installation for the rear projection or ceiling installation.
Lens Control	Avoids any operation of the lens such as "Lens Focus," "Lens Zoom," and "Lens Shift," by mistake. **On:** Enables adjustment of the lens. **Off:** Prevents any adjustment of the lens.
Anamorphic Lens	Select a setting to match the anamorphic lens conversion ratio. **1.24x:** Select this when you use an anamorphic lens with a horizontal rate of 1.24×. **1.32x:** Select this when you use an anamorphic lens with a horizontal rate of 1.32×.
Trigger Select	Switches the output function of the TRIGGER 1/TRIGGER 2 connector. **Off:** Turns off the TRIGGER connector function. **Power:** Outputs 12 V signals from the TRIGGER 1/TRIGGER 2 connectors when the unit is on. The TRIGGER 1/TRIGGER 2 connectors do not output any signals when the unit is in standby. **V Stretch:** Works with the "Aspect" setting's "V Stretch" (page 24) and outputs a 12 V signal from the TRIGGER 1 or TRIGGER 2 connector. **2.35:1 Zoom:** Works with the "Aspect" setting's "2.35:1 Zoom" (page 24) and outputs a 12 V signal from the TRIGGER 1 or TRIGGER 2 connector.
IR Receiver	Selects the remote control detectors (IR Receiver) on the front and rear of the unit. **Front & Rear:** Activates both the front and rear detectors. **Front:** Activates the front detector only. **Rear:** Activates the rear detector only.
Panel Alignment	This feature allows you to adjust the gaps in the color of characters or the picture on the screen. **Adjust:** Adjusts the gaps in the colors selecting "Adjust Item" or "Adjust Color." 　**Adjust Item:** Selects how to make adjustments from below. 　　**Shift:** Shifts the whole picture and makes adjustments. 　　**Zone:** Selects the desired range and makes adjustments. **Adjust Color:** Assigns the desired color to adjust the gaps in color. Select "R" (Red) or "B" (Blue) to make adjustments based on "G" (Green). **Pattern Color:** Select "R/G" (Red and Green) or "R/G/B" (White, all colors) when "Adjust Color" is "R" (Red). Select "B/G" (Blue and Green) or "R/G/B" (White, all colors) when the "Adjust Color" is "B" (Blue). **Adjust:** The shift adjustment and zone adjustment of the color selected in "Adjust Color" can be made with the ←/➡/↑/↓ button. 　When "Shift" is selected: Assign the settings of the horizontal direction (H) with the ←/➡ button and the vertical direction (V) with the ↑/↓ button on the shift adjustment screen. Panel Shift Alignment Adjust Color: R H: 0 V: 0 Adjust: ⊞⊞⊞⊞　Set: ⊞

Setting items	Description
	When "Zone" is selected: Select the position to adjust with the ←/→ button for the horizontal position (H Position) and the ↑/↓ button for the vertical position (V Position), then press ⊕.

Panel Zone Alignment
Adjust Color: R
H Position: 10
V Position: 10
Sel: ◄▲►▼ Set: ⊞ Back: MENU

Set the amount to adjust with the ←/→ button for the horizontal direction (H) and with the ↑/↓ button for the vertical direction (V). You can select the position to adjust again by pressing ⊕.

Panel Zone Alignment
Adjust Color: R
H: 0
V: 0
Adjust: ◄▲►▼ Set: ⊞ Back: MENU

Reset: Returns to the factory settings.
Preset: The optimized data has been preset.

Note
Depending on the adjustments made above, colors may become uneven or the resolution may change. |
| Network Setting | Perform internet protocol settings. |
| IPv4 Setting | **IP Address Setup**: Selects the IP address setting method.
 Auto(DHCP): The IP address is assigned automatically from the DHCP server such as a router.
 Manual: Specifies the IP address manually.
 When "Manual" is selected for "IP Address Setup," input "IP Address," "Subnet Mask," and "Default Gateway." Select each item with the ↑/↓ button, then press ⊕ button. Select the frame to input with the ←/→ button and input the value with the ↑/↓ button. When all items are entered, select "Apply," and then press the ⊕ button. The entered settings will be registered.
IP Address: Sets the unit's IP address.
Subnet Mask: Sets the unit's subnet mask.
Default Gateway: Sets the unit's default gateway.
MAC Address: Displays the unit's MAC address. This cannot be changed.
Apply: Enables the IP address that is set manually. |
| IPv6 Information | Displays the IPv6 information.
When you set the IPv6 IP address, set it on a Web browser (page 33). |

ⓘ Information Menu

The Information menu displays the model name, serial number, input signal type/format, software version and the cumulated hours of usage of the light.

Items	Description
Model Name	Displays the model name
Serial No.	Displays the serial number.
Signal type	Displays the resolution of the input signal which you are selecting. When input signals with 3D information are input, the type of input signals and the 3D format are displayed.
Color Format	Displays the color format of the input signal which you are selecting.
Color Space	Displays the color space of the input signal which you are selecting ("BT.601," "BT.709," or "BT.2020").
HDR Format	When the input signal is compatible with HDR, "HDR10" or "HLG" is displayed according to the input signal.
Software Version	Displays the software version.
Light Timer	Displays how long the light has been turned on (total usage).

Note

You cannot adjust or change the displays listed above.

About the Preset Memory

This unit has default image data to adjust preset data for input signals appropriately according to the signals shown in "Preset Signals" (page 41) (the preset memory). When the preset signal is input, the unit automatically detects the signal type and recalls the data for the signal from the preset memory to adjust it to an optimum picture. The signal type is displayed in the Information ⓘ menu.

Note

Depending on the computer input signal, parts of projection image may be hidden or displayed incorrectly.

Using Network Features

Connection to the network allows you to operate the following features.

Use the projector with only necessary functions enabled.

- Checking the current status of the unit via a Web browser.
- Making the network settings for the unit.
- Network monitoring and controlling with control protocol (Advertisement, ADCP, AMX DDDP (Dynamic Device Discovery Protocol), Crestron RoomView, Control4).

Notes

- When connecting this projector with the network, consult with the person who sets up the network. The network must be secured.
- When using this projector connected with the network, access the Control window via a Web browser and change the access limitation of the factory preset values (page 34). It is recommended to change the password regularly.
- When the setting on the Web browser is completed, close the Web browser to log out.
- The menu displays used for the explanation below may be different depending on the model you are using.
- Supported Web browsers are Internet Explorer (version 11 or later), Safari, and Chrome.
- The menu displays only English.
- If the browser of your computer is set to [Use a proxy server] when you have access to the unit from your computer, click the check mark to set accessing without using a proxy server.
- AMX DDDP is not compatible with IPv6.
- These network functions are available when the unit is turned on.

Displaying the Control Window of the Unit with a Web Browser

1 Connect the LAN cable.

2 Set the network settings for the unit using "Network Setting" on the Installation 🔧 menu (page 31).

3 Start a Web browser on the computer, enter the following in the address field, then press the Enter key on your computer.
http://xxx.xxx.xxx.xxx
(xxx.xxx.xxx.xxx: IP address for the unit)

When connecting by the IPv6 address

http://[xxxx:xxxx:- xxxx]

You can confirm the IP address of the unit under "Network Setting" on the Installation 🔧 menu.

The following window appears in the Web browser:

Once you make the network settings, you can open the Control window only by performing step **3** of this procedure.

Operating the Control Window

Switching the Page

Click one of the Page Switching buttons to display the desired setting page.
Page Switching buttons

Setting the Access Limitation

You can limit a user for accessing any particular page.

Administrator: Allowed access to all pages

User: Allowed access to all pages except the Setup page

When you access the Setup page for the first time, input "root" as the user name and "Projector" as the password in the authentication dialog.

When you log in for the first time, the window that prompts you to change the password is displayed. Follow the instructions on the screen to change the password.

The name of the administrator is preset to "root."

Entry area for [Administrator]

Entry area for [User]

The password can be changed in the Password page in the Setup page.

When you change the password, enter a new password. The password of the administrator and user should be 8 to 16 characters that includes both alphabet and numeric characters. Alphabet is case-sensitive.
The default password "Projector" cannot be set as a new password.

Note

If you forget your password, consult with qualified Sony personnel. The password will be reset with your permission.

Confirming the Information Regarding the Unit

You can confirm the current settings for the unit on the Information page.

Information area

Error Handling

Troubleshooting

If the unit appears to be operating erratically, try to diagnose and correct the problem using the following instructions. If the problem persists, consult with qualified Sony personnel.

Power

Symptom	Cause and Remedy	Page
The power is not turned on.	The power may not turn on if you turn the power off with I/⏻ (On/Standby) button and turn it on again in a short time. After about 1 minute, turn the power on.	–
	Check the indicators.	37
The power is suddenly turned off.	Check that "Power Saving" in the Setup 🧰 menu is set to "Standby."	26
	Set "Power Saving" to "Off."	26

Picture

Symptom	Cause and Remedy	Page
No picture.	Check that the connecting cable is connected to the external equipment properly.	10
	Select the input source correctly using the INPUT button.	11
	Check that the computer signal is set for output to an external monitor. If a notebook computer and the signal is output to its display and an external monitor, the external monitor's image may not be displayed correctly. Set your computer to output the signal to only an external monitor.	–
The picture has ghosts.	Video images are displayed in 3D. Watch the 3D video images using the 3D glasses, and set "2D-3D Display Sel." to "3D."	12, 27
Bright or dark area of the video appears too bright or too dark.	This symptom may occur when a signal level other than those of HDMI standard is input. Switch the output level of the connected equipment, or switch the Dynamic Range on the Function 🗄 menu of the unit.	27
The picture is too dark.	Adjust "Contrast" or "Brightness" on the Picture 🖼 menu properly.	19
The picture is not clear.	Adjust the focus.	7
	If the lens is clouded with dew condensation, leave the unit for about 2 hours with the power on.	–
The color of characters or the picture is not appropriate.	Select the desired color registration in "Panel Alignment" on the Installation 🔧 menu.	30
Image is left on the projection image. (Image retention)	When high contrast non-moving images are displayed for a long period of time, there may be some image retention on the projection image. This is only a temporary condition. Turning off the power for a while will eliminate the retained image.	–
Some color appears around the picture.	It may appear due to condensation. Wait for about 5 minutes with the power on.	–

On-screen display

Symptom	Cause and Remedy	Page
On-screen display does not appear.	Set "Status" on the Setup 🧰 menu to "On."	26
	Check if the ON/STANDBY indicator should light in green. When the ON/STANDBY indicator blinks in green, the unit is starting up. Wait until it stops blinking and remains lit in green.	7
The model name does not disappear from the screen.	The display mode of the unit may be set at the time of purchase. Consult with your local dealer or qualified Sony personnel.	–

Remote control

| Symptom	Cause and Remedy	Page
The remote control does not work.	Batteries could be weak. Replace them with new batteries.	–
	Insert the batteries with the correct polarities.	–
	If there is a fluorescent lamp near the remote control detector, the unit may work improperly or inadvertently.	–
	Confirm the position of the remote control detector on the unit.	3, 4
	Set "IR Receiver" to "Front & Rear" on the Installation 🔧 menu.	30
	Make sure that the cable is not connected to the IR IN connector.	3

3D video images

Symptom	Cause and Remedy	Page
The video image does not seem like 3D video images.	Check if the 3D glasses are turned on.	12
	Make sure that the battery in the 3D glasses is sufficiently charged.	–
	Set "2D-3D Display Sel." to "Auto" or "3D."	27
	Check if the input signals are compatible 3D signals.	43
	The 3D signals may not be input depending on the specifications of the connected AV selector/AV amplifier/external equipment. If the 3D signal is not input, confirm the specifications and/or settings of the AV selector/AV amplifier/external equipment.	–
	When the viewing position is too far from the unit, the 3D glasses may not be able to display the images properly.	12
	The screen size is not appropriate. Set the zooming magnification to low or watch the image from farther away from the screen.	48
	For details, see "Precautions for use" of "Using the 3D Glasses."	12

Others

Symptom	Cause and Remedy	Page
The fan is noisy.	Check the setting of "High Altitude Mode" on the Setup 🧰 menu.	26
	Make sure that the room temperature is not too high.	–
	Check the installation requirements of the unit. Fan speed increases to maintain the product reliability of the projector's components in a room where the temperature is higher than normal. The fan noise becomes slightly louder in these rooms. The approximate normal temperature for the unit is 25°C (77°F).	–
The lens shift cannot be adjusted.	The lens shift cannot be adjusted over the range of movement. Adjust the lens shift within the range of movement.	8, 48

About Indicators

The ON/STANDBY or WARNING indicator lights up or flashes if there is any trouble with your projector.

ON/STANDBY indicator   WARNING indicator

Flashing/Lighting indicators	The number of flashes	Cause and Remedy
(Lights in red) (Flashes in red)	Three times	The unit does not light properly due to an abnormality of the light source and light source power. Turn off, then turn on the power after a while. If the symptom persists, consult qualified Sony personnel.
	Six times	The unit detects a drop impact. If there is abnormality on the unit, consult with qualified Sony personnel. If there are no abnormalities on the unit, disconnect the AC power cord and check that the ON/STANDBY indicator turns off, then connect the AC power cord and turn the unit on.
	Eight times	The lens is not securely attached. Consult with qualified Sony personnel.
(Flashes in red) (Flashes in red) Both indicators flash	Twice	The internal temperature is unusually high. Check to ensure that nothing is blocking the ventilation holes and the unit is not being used at high altitudes.
	Three times	The fan is broken. Consult with qualified Sony personnel.

Note

If the symptom persists even after carrying out the above methods, consult with qualified Sony personnel.
If the indicator starts flashing in a way of other than the above, turn off, and then turn on the power with the I/⏻ (On/Standby) button on the remote control or control panel of the unit.
If the symptom is shown again, consult with qualified Sony personnel.

Message Lists

Warning messages

Symptom	Cause and Remedy	Page
High temp.! Light off in 1 min.	Turn off the power.	–
	Check to ensure that nothing is blocking the ventilation holes.	3, 4
Frequency is out of range!	Frequency is out of range. Input a signal that is within the acceptable frequency range of the unit.	41
Projector temperature is high. High Altitude Mode should be "On" if Projector is being used at high altitude.	Check to ensure that nothing is blocking the ventilation holes.	3, 4
	When using the unit at high altitude, set "High Altitude Mode" to "On." **Note** When temperature inside the unit remains high, "High Altitude Mode" is switched to "On" in 1 minute, then the fan speed increases.	26
Power Saving Mode is set. Projector will automatically enter Standby Mode in 1 minute.	"Power Saving" is set to "Standby." **Note** If no signal is input, the power turns off after 1 minute, and the projector goes into standby mode.	26

Caution messages

Updating the Software

You can download files to update the software of the unit. Copy the downloaded files to your USB memory, insert the USB memory to the USB terminal of the unit, then perform the update.
To use the features updated, insert a USB memory device into a PC connected to the internet.
Download the update files from the following Sony website:
https://www.pro.sony.eu/
The website also explains how to install the update.

Note

Some USB memories may not be supported for use. For details, refer to the website above.

About HDR (high dynamic range)

HDR is a video expression which improves the ability to express dark places and bright places compared to previous video expressions.

About the Simulated 3D Feature

• Use the simulated 3D function taking into account that the picture will provide a different look from the original images, because this function converts the video images.
• Note that if the unit is used for profit or for public viewing, displaying 2D video images as 3D video images by converting to the simulated 3D may constitute an infringement of the rights of authors or producers, which are legally protected.

Trademark Information

• "Blu-ray" and "Blu-ray Disc" are trademarks of Blu-ray Disc Association.
• "x.v.Color (x.v.Colour)," "Motionflow," and their logos are trademarks of Sony Corporation.

....
This projector supports DeepColor, x.v.Color, LipSync, computer input signal, 3D signal, 4K signal of HDMI standards. It also supports HDCP.

Specifications

Item		Description
Display System		SXRD panel, projection system
Display device	Size of effective display area	0.74-inch (18.8 mm) SXRD
	Number of pixels	26,542,080 pixels (8,847,360 pixels × 3)
Projection lens		Motorized Lens (VPLL-Z7013) Throw Ratio 1.27:1 to 2.73:1 F2.9 to F3.9 Shift: ±80% (V), ±31% (H)
Light source		Laser diode
Projection image size		60-inch to 300-inch (1,524 mm to 7,620 mm) (measured diagonally)
Accepted digital signals		See "Preset Signals" (page 41).
Inputs/Outputs	HDMI connectors (HDCP 2.2)	× 2
	TRIGGER connectors	× 2, mini jack, DC 12 V, Max. 100 mA
	REMOTE connector	RS-232C: D-sub 9-pin (male)
	LAN connector	RJ45, 10BASE-T/100BASE-TX
	IR IN connectors	Minijack
	USB connector	Type A, DC 5 V, Max. 500 mA
Outside dimensions (w/h/d)		560 mm × 223 mm × 496 mm (22 $^1/_{16}$ inches × 8 $^{25}/_{32}$ inches × 19 $^{17}/_{32}$ inches) (without protrusions)
Mass		Approx. 22 kg (49 lb)
Power requirements		AC 100 V to 240 V, 4.9 A to 2.2 A, 50/60 Hz
Power consumption		490 W
Standby mode power consumption	Standby	0.4 W (when "Remote Start" is set to "Off")
	Networked Standby	1.0 W (LAN) (when "Remote Start" is set to "On")When a LAN terminal is not connected, it becomes a low power consumption mode (0.5 W).
Operating temperature		5°C to 35°C (41°F to 95°F)
Operating humidity		20% to 80% (no condensation)
Storage temperature		–10°C to +60°C (14°F to 140°F)
Storage humidity		20% to 80% (no condensation)
Supplied accessories		See "Checking the Supplied Accessories" on the Quick Reference Manual.
Optional accessories		Projector Suspension Support: PSS-H10 Projection Lens VPLL-Z7008: Motorized, Throw ratio: 0.80:1 to 1.02:1, Shift: ±50% (V), ±18% (H), F2.9, Projected image size: 60" to 1000" (1,524 mm to 25,400 mm), Maximum external dimensions: 134 mm × 134 mm × 309 mm (5 $^9/_{32}$ inches × 5 $^9/_{32}$ inches × 12 $^5/_{32}$ inches) (W × H × D), Mass: 3.7 kg (8.2 lb)

Notes

- The values for mass and dimensions are approximate.
- Not all optional accessories are available in all countries and area. Please check with your local Sony Authorized Dealer.
- Information on optional accessories in this manual is current as of April 2021.

Design and specifications of this unit and its optional accessories are subject to change without notice.

Preset Signals

The following table shows the signals and video formats which you can project using this unit.
When a signal other than the preset signals shown below is input, the picture may not be displayed properly.

Preset memory no.	Preset signal (resolution)		fH (kHz)	fV (Hz)	Sync
5	480/60p	480/60p (Progressive NTSC) (720 × 480p)	31.470	60.000	–
6	576/50p	576/50p (Progressive PAL) (720 × 576p)	31.250	50.000	–
7	1080/60i	1080/60i (1920 × 1080i)	33.750	60.000	–

Projection Distance and Lens Shift Range

The projection distance refers to the distance between the front of the lens and the projected surface.
The lens shift range represents the distance in percent (%) by which the lens can be shifted from the center of the projected image. The lens shift range is regarded as 0% when the point Ⓐ in the illustration (point where a line drawn from the center of the lens and the projected image cross at right angles) is aligned with the center of the projected image and full width or full height of the projected image is regarded as 100%.
Shaded region: Lens shift range

VS +:Vertical lens shift range (up) [%]
VS −:Vertical lens shift range (down) [%]
HS +:Horizontal lens shift range (right) [%]
HS −:Horizontal lens shift range (left) [%]

When projecting in 1.90:1 (Native Full Display 17:9) format
```

NOTICES AND LICENCES FOR SOFTWARE USED IN THIS PRODUCT

GPL/LGPL LICENSED SOFTWARE

The following GPL executables and LGPL libraries are used in this product and are subject to the GPL/LGPL License Agreements included as part of this documentation:

Package list:

linux-kernel
alsa-lib
busybox
crypto
directfb
dosfstools
e2fsprogs
exceptionmonitor
fuse
gdisk
glib
glibc
iptables
libmicrohttpd
libnuma (in numactl)
procps
pump-autoip
XZ utils

Source code for these executables and libraries, as well as other executables and libraries, can be obtained using the following link:

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA. Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it. For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations. Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any

associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable

runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License.

However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances. It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any

other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU.

SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS
How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.> Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode: Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type 'show w'.

This is free software, and you are welcome to redistribute it under certain conditions; type 'show c' for details.

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than 'show w' and 'show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program 'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs.

If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

===============================

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA. Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software-to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packagestypically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms.

A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not

make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy. This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number.

If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version

number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS
How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public license as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA.

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library 'Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990

Ty Coon, President of Vice
