

RETHINK VIDEO CONFERENCING

Our Nearus™ video conferencing line is designed to be compatible with a wide range of software, allowing you to provide your clients with a complete video conferencing system at an affordable price. Whether your clients use a sophisticated solution like Blue Jeans® or prefer the simplicity of Skype®, Nearus provides a simple, affordable way to collaborate.

CHANGING THE WAY YOU THINK ABOUT CONFERENCING

- Your software, our hardware: use with Skype®, Skype for Business, GoToMeeting® and more
- Computer based: if you can use a computer, you can use Nearus
- Fits any room size: audio and video options for all conferencing applications
- Easy to design and sell: call us and we'll show you how
- Cost effective: low cost + protected line = real profits

PT with Wide Angle Lens

CAMERAS

Nearus™ USB 2.0 Pan-Tilt (PT) and Pan-Tilt-Zoom (PTZ) Web Conferencing Cameras provide clean, high-quality images, filling the product gap between consumer-grade web cameras and complicated, expensive codec-based conferencing systems, which most SMB clients don't need. Equipped with features like IR/RS-232 control and a custom mounting shelf, these cameras make video conference room installs simple and efficient.

- USB 2.0 video output allows for plug-and-play computer connections
- PTZ model offers remote pan, tilt and zoom with preset options
- High resolution HD 1080p video
- Includes connections for an RS-232 modem and a remote control
- Included mounting shelf makes wall installations easy

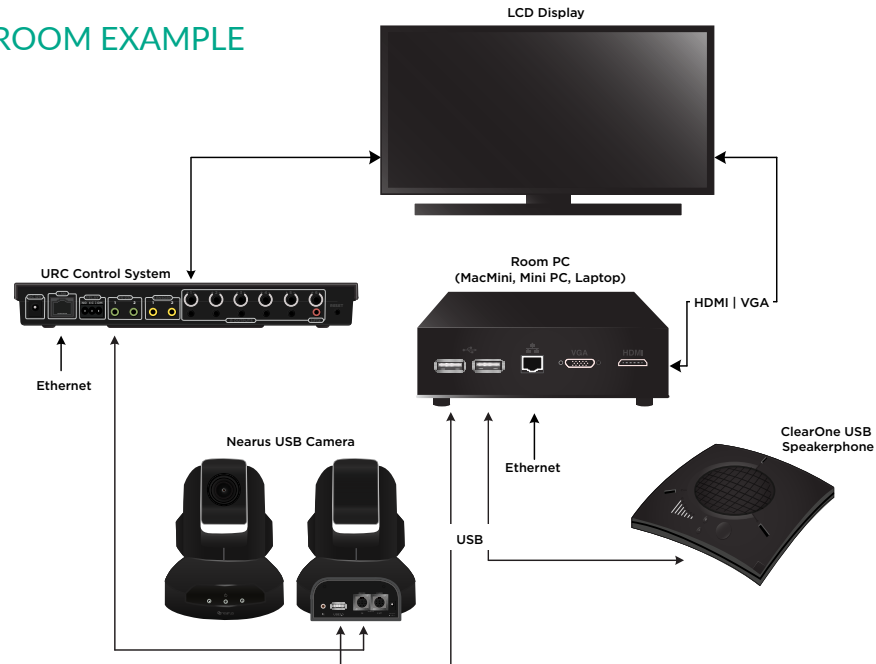

PTZ with 10x Zoom

OUR COMPLETE HARDWARE SOLUTION

A Nearus web conferencing system can be designed and installed with minimal time and effort. Plus, because of the line's simplicity and affordability, clients have the option to add video conferencing to multiple rooms, offering more flexibility.
