

## Control Integration Summary

### Notes:

- 1 For professional AV integration, RA2 Select supports a Telnet based integration protocol, similar to that used by Caséta Wireless, RadioRA 2, and HomeWorks.
- 2 To integrate with these systems, an "integration driver" is required in the Control System company's programming tool to map the Lutron system into their system.
- 3 The Control System company is responsible for creating the integration driver for their system.
- 4 For RA2 Select, Telnet integration is turned off by default. If integrating to one of the AV systems, Telnet needs to first be turned on in the Advanced > Integration section of the Lutron app
- 5 To access the Integration IDs and Device Integration, navigate to the Advanced > Integration section of the Lutron App. The Integration Report may be emailed.

	Elan	Control4	URC	RTI	Crestron	Savant
<b>Recommended Driver</b>	RA2 Select Driver	RA2 Select Driver	Caséta Driver	RadioRA 2 Driver	RadioRA 2 Driver	RA2 Select Driver
<b>Driver Integration Protocol</b>	Mapping of integration details required.*	Supports SDDP. RadioRA 2 driver must be manually added.	Supports dimming; can import Lutron App Integration Report.	Mapping of integration details required*	Mapping of integration details required*	Mapping of integration details required*
<b>Integration Fee</b>	Free	Free	Free	Free	Charges to integrate to any Lutron system	Free
<b>Scene Trigger (up to 100 on the Main Repeater)</b>	✓	✓	✓	✓	✓	✓
<b>Pico button press &amp; release</b>	✓	✓	✓	✓	✓	✓
<b>4-button Pico press &amp; release</b>	✓	✓	✗	✗	✓	✗
<b>Pico button press monitoring</b>	✓	✓	✓	✓	✓	✓
<b>Dimmer / Switch / Fan / Shade Control</b>	✓	✓	✓	✓	✓	✓
<b>Get Level (View Devices)</b>	✓	✓	✓	✓	✓	✓
<b>Set Level (Adjust Lighting)</b>	✓	✓	✓	✓	✓	✓
<b>Dimmer / Switch / Fan / Shade Monitoring</b>	✓	✓	✓	✓	✓	✓
<b>Sensor Integration</b>	Not currently supported for RA2 Select					

Note: Each integration driver is unique to the control system company. While we believe this list accurate, there may be places where the capability for integration is available from the Lutron side, but the control system does not yet support it.

\*Need to manually map integration details from the integration report. To access Integration IDs and Device Integration menu, navigate to the Advanced > Integration section of the Lutron App. Integration Report may be emailed.
